

## **NEW TECHNOLOGY, REGULATORY IMPACT TAKE CENTER STAGE AT GLI'S 7<sup>TH</sup> ANNUAL REGULATORS ROUNDTABLE**

LAS VEGAS (January 30, 2008) – It seems each day brings a new technological advancement, and to help gaming regulators stay ahead of it all, Gaming Laboratories International is presenting its 7<sup>th</sup> annual Regulators Roundtable and Users Conference.

The annual event has become a must on the to-do lists of regulators across North America and takes place February 6-8 at the Tuscan Suites Casino in Las Vegas. The Roundtable will cover crucial topics including advances in server-based gaming, GSA protocols and interoperability testing, mobile gaming, malfunctions, network security, slot math, technical standard writing and verification tools.

Beyond the sessions, new this year are specialized break out sessions and a keynote lunch presentation by Bruce Rowe, Sr. VP of Business Development for Bally Technologies.

The event is presented free of charge for regulators, and reservations are required. For reservations and information, visit [www.gaminglabs.com](http://www.gaminglabs.com) or call (702) 914-2220. A sleeping room block is also available.

GLI President and co-founder James R. Maida said, “The reality is, many of the technologies we have been talking about in theory for the last couple of years are here, ready to go onto the casino floor, and it is imperative for regulators to fully understand the technologies and the potential impact they may have on jurisdictions. That’s why we present the Roundtable free of charge, to help protect the integrity of the industry.”

The Roundtable is a two-day series of seminars on the latest technology affecting gaming products and regulations. In addition to the seminars, the Roundtable is widely known as providing a unique forum for regulators to network and discuss ideas with their peers from across jurisdictions.

Gaming Laboratories International operates nine fully accredited testing laboratories worldwide, in addition to fully accredited inspection bodies in America, Europe and Africa. GLI is the only independent testing laboratory of its kind to hold both U.S. and International accreditations for compliance with ISO 17025 and 17020 standards for technical competence in testing and inspection services.
